

TOOLS & TECHNOLOGY TO GROW THE CHURCH

WORKSHOP INCLUDES DEEP DIVE BREAKOUT SESSIONS!

Good News! We're offering a special opportunity to explore two powerful ministry software tools that will help you better engage your parishioners and reach your community. Our next Church Management Network meeting is transforming into a hands-on session where you'll get to dive into tools that can help grow your parish. Join us at Bethany for exclusive on-site training with ACS Technologies (formerly PDS) on two of their top ministry software solutions!

MISSIONINSITE demographic software which enables parish leaders to learn more about their communities

MINISTRY PLATFORM next generation, church management software that allows parishes to more deeply engage their parishioners

**8:30AM - 2:30PM
WEDNESDAY, DECEMBER 11**

Cost: FREE!

Registration: Required

Includes a Special Christmas Lunch of Gratitude!

Scan to register!

This special service aligns with our new Pastoral Plan (Specifically: Goal 6, Call to Conversion 1, Putting it into Action 3):

"As part of this commitment parishes will receive special resources and training designed to assist in their pastoral outreach, empowering them to serve more effectively within their mission fields."

**Space is limited. Register early.
Take advantage of these valuable tools!
MissionInsite is FREE for our diocese!**

MORE DETAILED EVENT INFORMATION: Tools & Technology to Grow the Church

Our next Church Management Network meeting is being transformed into some hands-on exploration of tools that can grow your parish! We have invited ACS Technologies (formerly PDS) to provide on-site training on two of their ministry-related software:

MISSIONINSITE Since 2021, the Diocese of Saint Petersburg has offered parishes free access to the demographic software, “MissionInsite” which enables parish leaders to learn more about their communities. On December 11, we will have an opportunity to take a deeper dive into how to use this software to grow your community. For those who haven’t used it, an overview will be given. For those who want to use it more, or who are advance users, special “breakout sessions” will be offered.

MINISTRY PLATFORM This is a next generation, church management software/database that allows parishes to go deeper in engaging their parishioners, meeting them where they are and moving them closer to Christ. Some parishes have expressed interest in utilizing the latest technological resources available to connect with their parishioners as well as those who may visit them (i.e., snowbirds, vacationers, etc.). While ParishSoft Accounting continues to be the required accounting software for the diocese, ParishSoft Family Suite is not the mandated database. If you are interested in taking a look at an alternative (and perhaps, after hearing about it, consider being part of a special diocesan pilot program), ACS Technologies will provide more insight on how you can use this new technology. (Attending does not require you to commit.)

Who may attend? This is a special session for Pastors, Pastoral Administrators, Parish Business Managers, Pastoral Associates, Directors of Religious Education/ Faith Formation/Evangelization, Youth Ministers, Directors of Stewardship, Communications and Outreach, database managers, and those who want to learn more about the tools available to reach our parishioners and our neighbors to grow the Church. You may bring more than one person from your parish.

Questions, please contact Dr. Lois Locey, Chancellor for Administration at 727.317.4559 or by email: LLocey@dosp.org
